PROJECTS

Netflix Clone App(called the Flixx App)

GitHub:https://github.com/Princessdada/flixx_movie_app

Liver Server: <https://princessflix.netlify.app/>

- Description: Developed a Netflix clone app using HTML, CSS, and JavaScript to mimic the user interface and basic functionalities of Netflix.
- Features:
 - o Dynamic homepage showcasing movie thumbnails with hover effects.
 - o Content filtering and search functionality.
 - o Responsive design for optimal viewing on various devices.
 - o Integrated Swiper.js library to create a carousel for displaying movies and TV shows.
- Technologies Used: HTML, CSS, JavaScript, Swiper library and TMDB API (for movie data).

Wedding Website Creation

- Collaborated with a colleague to design a website using and incorporating my knowledge on HTML and CSS
- Incorporated responsive design for optimal viewing for all devices
- Using the couples preferences, I customized the website's layout, color scheme and design
- Designed and implemented a user-friendly layout that showcased the event layout, gallery, venue and RSVP functionality
